MATERIALS SPECIFICATION

| | | |
|--|--|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | | Any coloured panels used have a pigmented resin that stands up to UV radiation and aggressive cleaning chemicals which may need to be used to clean off graffiti. |
| | | The use of unpainted stainless steel means it is MAINTENANCE FREE and will stand up to bad weather, urban pollution and aggressive cleaning chemicals used to clean graffiti making it an extremely durable material that is also 100% recyclable. |
| | | All fixings are stainless steel meaning they can stand up to corrosion and climatic variations. ALL fixings are protected by VANDAL PROOF caps. |
| | | The Speed Gyro roundabout features a stainless steel rim around the edge offering EXTRA PROTECTION from damage from anti-social behaviour increasing the DURABILITY of the product. |
| | | Grassmat uses recycled rubber and allows the existing grass surface to grow through making it EASILY MAINTAINABLE. Grassmat comes with a 10 YEAR PRODUCT GUARANTEE ensuring a safe, durable and cost-effective surfacing solution. |
| | | Minimal use of panels on all equipment and especially the main multipurpose units to ensure VISIBILITY throughout the site and discourage congregating and anti-social behaviour. |
